

Plate Racks

Our plate racks range from the standard vertical bar rack design to the exquisitely-engineered Fusion Spin-Rack. This 2-level rack works with all styles of olympic plates and can fit in a corner or up against a wall, as both levels fully rotate 360 degrees. This is absolutely the coolest olympic plate rack anywhere. Besides holding up to 1,000 pounds of olympic weight, some of our models also hold 2 olympic bars vertically as well. Whether it's our iron, rubber, urethane or rubber bumper power plates, we have a weight plate storage rack to meet your needs and budget. Custom-painting is available; check out the details with your local Hampton Fitness representative.
