

MACHINE BARS AND RACKS

Machine Bars and Racks

One of our most popular products is now outfitted with Gel-Grip® urethane handles! All of our bars feature a solid steel construction with ergonomic grips. Hampton Fitness was the first company ever to make such a bold design. Don't be fooled by the rubber inferior knock-off products that swell, tear, and fall off the bar. Our URETHANE coated non-porous surface is warranted for 5 years. Hampton Fitness also has the widest variety of training tools when it comes to mixing up your workouts, just look at our HTPH series for fresh new ideas! Our vertical machine bar racks feature small footprints, making them ideal for use in limited-space settings. These racks are the perfect way to organize and/or display your machine attachment bars in a clean, efficient and safe manner, getting them up off of the floor. All racks can be custom-painted to match any color scheme; just ask your local representative for details.
