OLYMPIC URETHANE

Hampton's new grip plates are fully encased in high-quality urethane, preventing scratches to floors and equipment. Urethane is non-porous, therefore easier to clean, more hygienic, and longer lasting than other plate materials. The Hampton Grip plate has a recessed area around the ergonomically curved handles, making it easy to pick up off the floor, and features a steel hub for smooth loading and unloading. Also available in rubber and cast-iron finishes.

Hampton's Urethane Grip plate features a resilient finish that does not contain any lead properties. The grip plate has a recessed area around the ergonomically curved handle, making it easy to pick up off the floor.

Item	Plate	Hole	Thickness
HOGU-2.5LB	165 mm	51 mm	23 mm
